

PATIENT: _____ DATE: _____

NO FAULT / PERSONAL INJURY

No Fault benefits are available regardless of how an accident occurred or who is at fault, with few exceptions. No Fault pays for medical services under the broad umbrella of health care. Medical benefits are available for as long as the patient requires them in order to return to pre-accident condition.

The injured person must report the accident to the No Fault carrier within 90 days of its occurrence. After notification the carrier sends the patient a No Fault application which must be completed and returned to the carrier before any benefits will be allowed. If this form is not completed the carrier can deny all benefits.

Work Release/Return to Work: Our office must be notified when there is lost time from work and any work restrictions that may apply.

Mileage Report: A patient can submit a list of visits to the carrier on a periodic basis for mileage reimbursement. Upon request, our office will print a list showing all your dates of service for the period of time requested.

Accessories: Most accessories such as pillows, inserts, wedges, etc. pertaining directly to your condition will be covered by the carrier.

Concurrent Treatment: A patient is not allowed to treat with two different health professionals on the same day. In addition, most carriers will not cover treatment to a Physical Therapist and a Chiropractor for the same condition.

Independent Medical Exam (IME): At some point during treatment, the carrier may notify patient to report for an exam with a chiropractor of their choosing. You must report for these exams. After the IME, quite often the carrier will reduce benefits or deny them altogether.

Medical Lien: When your No Fault benefits have been denied, if you decide to pursue litigation with an attorney you will be asked to sign a Medical Lien, which guarantees payment to our office for services rendered. We will forward the Medical Lien to your attorney for review and signature.

Arbitration: Arbitration is an informal hearing, usually held in an arbitrator's office. There is a \$40.00 filing fee for an arbitration. When filing you should include the No Fault denial form

(NF-10), copy of the IME report, medical records or office notes from treating doctors, and copies of all bills in dispute.

CARE PLAN

Spinal rehabilitation is a long-term process that becomes longer based on; (a) age, (b) the number of postural misalignments present, (c) phase of degeneration, (d) trauma, (e) general overall health, and (f) severity of presenting symptoms.

In order to correct spinal misalignments, control pain and improve mobility, your treatment will begin aggressively for the first 90 days, and will continue with less frequent corrective care to get you back to your pre-injury status. The scientific concept behind your care is to apply a repetitive force over time to the spine, improving the motion and alignment of all subluxated vertebrae.

It is not unusual for the insurance carrier to cease coverage in the middle of the adjustment program. However, if you stop treatment, you will still have the problem you sought to remedy. For this reason, we are committed to work through any problems as long as you have the commitment to achieve your maximum health potential.

Dr. Borio has designed a treatment plan with a specific number of visits in order to obtain optimal results. It is your responsibility to use all visits as specified by the doctor.

Treatment Schedule:

3 x / Week for _____ Weeks

2 x / Week for _____ Weeks

1 x / Week for _____ Weeks

Do Not interrupt the consistency and intensity of your adjustment schedule, or you will lose the correction you have already achieved. We have never turned anybody away because of their financial situation - but we have turned people away for not making their health a priority !

Borio Chiropractic Health Center

P.O. Box 1890, 8212 Brewerton Road, Cicero, New York 13039
